

Both wooden models are the same size, weight and power and can be made with single or twin drive.

**Differences:**

**SII Cosmetics:**

- Front apron below grille.
- Sides cover sill area and a 'Round over' swage line full length of body.
- Wheel arches have 'swoopy' L/R style curves.
- Dummy indicator lamps all round.
- Wedge shaped dash panel moulding.
- Instrument panel sticker in SII twin dial style.
- 15½" Rugged road tread tyres.

**SII Building:**

- Metric measurements
- Part set panel patterns [see description S1]

**S1 Cosmetics:**

- Bumper iron, front cross member and starting handle chassis hole detail .
- Front panel has different shape and larger grille area.
- Wheel arches: half moon shape.
- No indicator lamps in wing fronts.
- Screen folds from different position.
- Body sides finish above chassis to show dummy chassis rails.
- 15½" Rugged road tread tyres.
- 16" Optional tyres available.
- Oval shape dash moulding.
- Instrument panel sticker shows three dials and switch in SI style.
- Detail set [drawings in manual] includes:
  - Grab handle for dash area,
  - Dummy hinges on doors, reinforcing corners,
  - starting handle hole escutcheon on bumper

**SI Building:**

- Metric measurements
- Part set of panel patterns [sides, inner wings, front panel, cross member etc.] All non square or oblong panels.
